Intel-based ThinkSystem tools

Lenovo

## ST50 V3 management tools

Unlike the previous generation of ST50 V2 systems that use Intel AMT 15 for system management, the ST50 V3 supports the same management tools as the other Intel-based ThinkSystem servers. These tools include Lenovo XClarity Controller (XCC), Lenovo XClarity Provisioning Manager (LXPM), Lenovo XClarity Essentials (LXCE), and Lenovo XClarity Administrator (LXCA). For information on how to use ThinkSystem management tools, refer to the following resources:
