## Product overview

The ThinkEdge SE455 V3 (machine type: 7DBY) is a new edge server specifically designed to meet the needs of edge computing, edge AI, hybrid cloud operations, and workloads at edge locations. The ThinkEdge SE455 V3 is an AMD EPYC™ 8004-based, 2U, full-width edge server. The system can support up to 576 GB of memory in six slots using 96 GB RDIMMs. Six single-width GPUs or two double-width GPUs are supported by utilizing the two available risers. It can be mounted in a 1000 mm rack mount, 600 mm rack mount, or two-post rack mount. This edge server can handle temperatures from -5°C to 55°C.
