

SD535 V3 system configurations

Block diagrams and hardware configurations

Lenovo

SD535 V3 block diagram

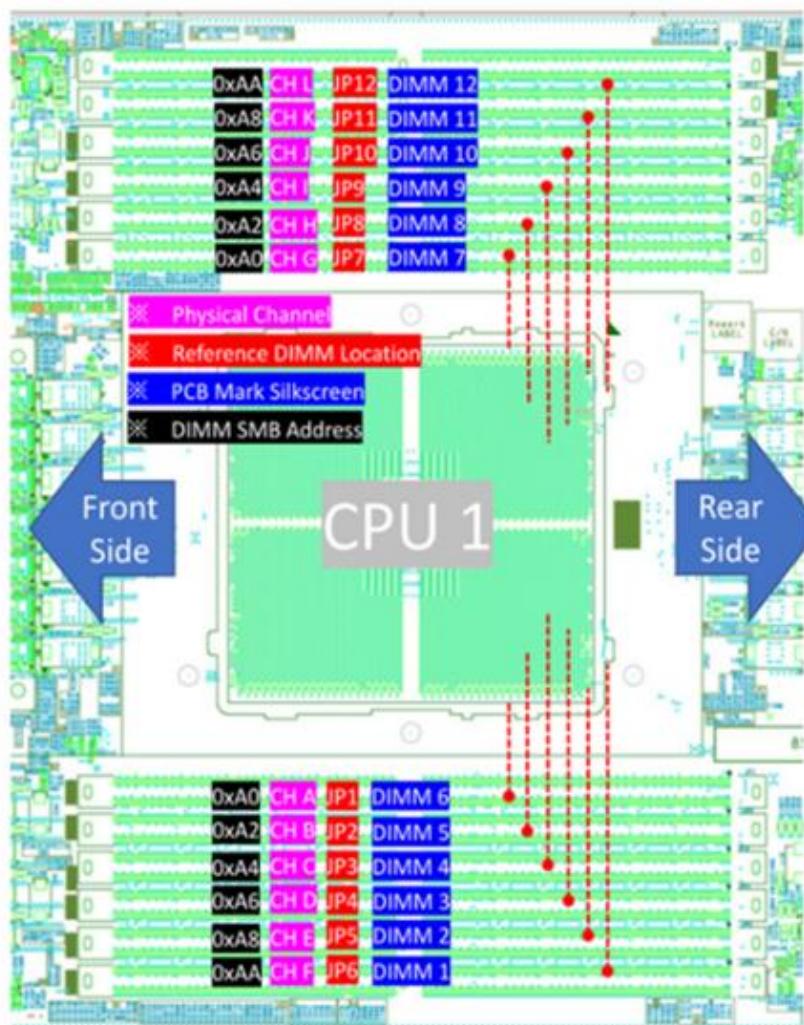

Minimum system configuration

The minimum configuration required for the node to start is as follows:

- One processor
- One memory module in DIMM slot 6
- One power supply in PSU slot 1
- One M.2 or 2.5-inch boot drive and a RAID adapter if one is configured (if an OS is needed for debugging)
- Four system fans

Memory mapping and configuration

Refer to the table below for the population sequence.

			CPU1												
DDR5	Mode	CPU#	UMC8	UMC7	UMC11	UMC6	UMC10	UMC9		UMC3	UMC4	UMC0	UMC5	UMC1	UMC2
Slot Number		Slot12	Slot11	Slot10	Slot9	Slot8	Slot7		Slot6	Slot5	Slot4	Slot3	Slot2	Slot1	
1	Independent	1								DDR5					
2	Independent	1								DDR5					
4	Independent	1								DDR5				DDR5	
6	Independent	1								DDR5	DDR5		DDR5	DDR5	
8	Independent	1		DDR5						DDR5	DDR5	DDR5		DDR5	
10	Independent	1		DDR5	DDR5	DDR5	DDR5			DDR5	DDR5	DDR5	DDR5	DDR5	
12	Independent	1	DDR5	DDR5	DDR5	DDR5	DDR5			DDR5	DDR5	DDR5	DDR5	DDR5	DDR5

For example, if one DIMM is to be installed, install it in slot 6. If two DIMMs are to be installed, install them in slots 6 and 7.

Memory installation guideline

Follow these rules when installing DIMMs:

- Mixing DIMMs from different vendors is supported
- Mixing x4 and x8 DIMMs is not allowed
- Mixing 3DS RDIMM and non-3DS RDIMM is not allowed
- Mixing 4-rank 3DS RDIMM and 8-rank 3DS RDIMM is not allowed
- Mixing 16 Gbit (16 GB, 32 GB, 64 GB) and 24 Gbit (24 GB, 48 GB, 96 GB) memory modules is not allowed
- Mixing single-rank and dual-rank DIMMs is allowed
- When installing DIMMs with different capacities, install the DIMM with the highest capacity first
- For best performance, install memory modules of identical capacity and rank across all 12 channels

Thermal support

Node	CPU Sockets	Slot Capability	Storage Configuration	CPU power & Ambient Temp. Support	DIMM Capability	CPU Heatsinks Solution	Fan Solution
SD535 V3	1S	<ul style="list-style-type: none"> • 1x 2ports PCIe • 1x 4ports OCP 	<ul style="list-style-type: none"> • 6x HDDs • 2x M.2 boot drives 	<ul style="list-style-type: none"> • 300W (9354P, 9534) @30C • 240W (9124) @35C 	<ul style="list-style-type: none"> • 12x 96G 	<ul style="list-style-type: none"> • 1U EVAC HSK 	4x 4056 – Per Node
