DE Series storage arrays – May 2025 updates

Lenovo

What's new in the May 2025 updates

New DE Series models: DE4200 and DE4800

The DE4200 and DE4800 are scheduled for release in May 2025. The DE4200 and DE4800 are 2U or 4U, 12-, 24- or 60-drive storage enclosures with support for hybrid or all-flash drive configurations.

For more information, refer to the [Product overview: DE4200 and DE4800 section](#) in this course.

Product description, enclosure front view, and rear view

Lenovo

ThinkSystem DE Series storage arrays product overview

Lenovo ThinkSystem DE Series storage arrays are SAN storage systems that are designed for medium to large businesses. ThinkSystem DE Series storage arrays deliver hybrid and all flash storage with enterprise-class storage management capabilities and various host interface card (HIC) options.

The DE Series storage arrays support the 2U enclosure with 12 3.5-inch or 2.5-inch drives (2U12), the 2U enclosure with 24 2.5-inch drives (2U24), and the 4U enclosure with 60 3.5-inch or 2.5-inch drives (4U60). Each enclosure supports two controllers for redundancy.

ThinkSystem DE Series storage arrays – features

Dynamic Disk Pools (DDP)

With the DDP feature, DE Series systems provide faster rebuild times than traditional RAID.

SSD read cache (model dependent)

The SSD read cache increases the performance of read-centric workloads.

Snapshot and Volume Copy

Provides more precise recovery point objectives and faster storage recovery

Thin Provisioning

A storage allocation scheme that automatically allocates storage as the user's applications need it. Enabling this feature may reduce storage system performance.

Mirroring (synchronous or asynchronous, model dependent)

Enterprise-class disaster recovery of data with FC and IP replication

Encrypted Drive Support

Extended security enhancements for compliance and regulations

Note:

- The mirroring and snapshot features require the additional Lenovo Features on Demand (FoD) keys to enable the full functions.
- Async Mirroring on DE4200/DE4800 supports Fibre Channel protocol only.

NVMe-oF feature

DE Series storage arrays now support the following NVME over Fabrics (NVMe-oF) features:

- NVMe-RoCE (RDMA over Converged Ethernet)
 - Uses the the new dual-port 100 Gb NVMe-RoCE host interface card (HIC)
 - Allows NVMe protocol emulation to SAS drives
 - Uses new NVMe-oF submodel ID (SMID) migrations for new DE6000H/F controller IDs
 - Only valid for DE6000H/F 64 GB controllers (one per controller)
- NVMe-FC
 - Uses the existing FC HIC with NVMe-FC protocol
 - Utilizes the same NVMe-oF SMIDs used with the NVMe-RoCE HIC
 - Only valid for DE6000H/F 64 GB controllers (one per controller)

For more information about NVMe-oF, refer to the NVMe organization website:

https://nvmexpress.org/wp-content/uploads/NVMe_Over_Fabrics.pdf

Note: The NVMe-oF features on DE Series storage arrays require the 11.60.2 or later version of firmware to be installed.

ThinkSystem DE Series product list

Marketing name	Machine Type	Form factor	Available controller HLC options
DE2000H	7Y70	2U12	<ul style="list-style-type: none"> • Two-port 10Base-T • Two-port SAS
	7Y71	2U24	
DE4000H	7Y74	2U12	<ul style="list-style-type: none"> • Four-port SAS • Four-port 16 Gb FC / 10 Gb iSCSI • Four-port 32 Gb FC • Four-port 10/25 Gb iSCSI
	7Y75	2U24	
	7Y77	4U60	
DE4000F	7Y76	2U24	
DE6000H	7Y78	2U24	<ul style="list-style-type: none"> • Four-port SAS • Four-port 32 Gb FC (support for NVMe-oF mode) • Four-port 10 /25 Gb iSCSI • Two-port 100 Gb NVMe-RoCE
	7Y80	4U60	
DE6000F	7Y79	2U24	

ThinkSystem DE Series expansion enclosure product list

Marketing name	Machine Type	Form factor	Description
DE120S	7Y63	2U12	Supports 2.5-inch or 3.5-inch drives
DE240S	7Y68	2U24	Supports 2.5-inch drives
DE600S	7Y69	4U60	Supports 2.5-inch or 3.5-inch drives

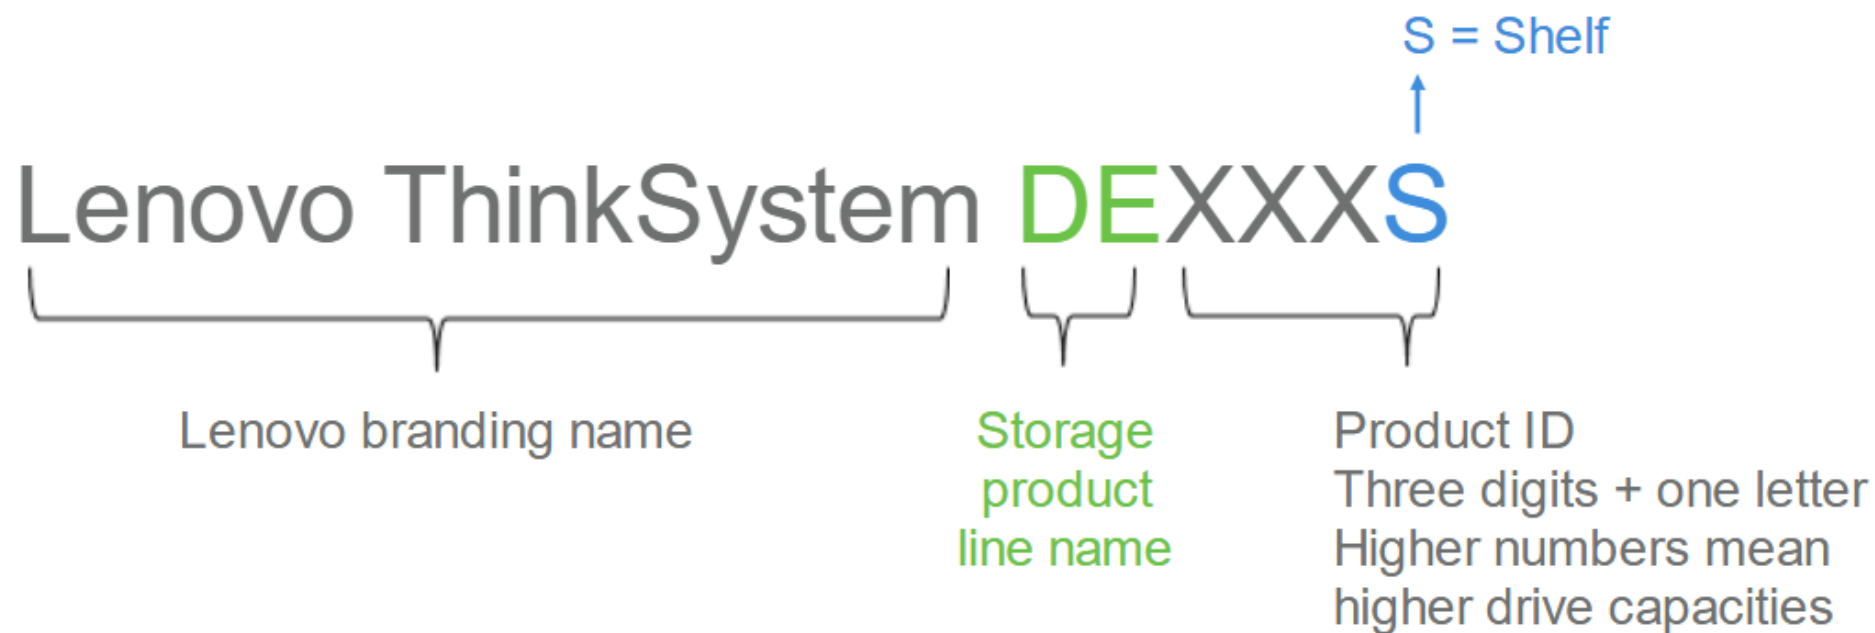

DE Series storage arrays naming rules

Example:

- Lenovo ThinkSystem **DE**4000**H**
 - Supports HDD and SSD hybrid drives configuration
 - Controller cache: 8 GB per controller
- Lenovo ThinkSystem **DE**6000**F**
 - Supports all SSD flash drives configuration
 - Controller cache: 64 GB per controller

DE Series expansion enclosure naming rules

Example:

- Lenovo ThinkSystem **DE120S**
 - 2U12 expansion enclosure
- Lenovo ThinkSystem **DE600S**
 - 4U60 expansion enclosure

2U12

2U24

4U60

DE Series front views

The 4U60 enclosure contains five drive drawers. Each drawer supports 12 3.5-inch or 2.5-inch drives.

For proper cooling, a minimum of 20 drives are required, with four drives installed in the front row of each of the five drawers. There are no drive fillers.

Drive roles in DE Series systems

- Dynamic Disk Pools
 - Randomly distributes data for each volume across the set of drives in the pool
- Volume group
 - Distributes data across the drives based on RAID level
- DSSD read cache
 - Extends the controller read cache
- Hot spare drive
 - Protects volume groups from drive failures

* IOM = I/O module

DE Series expansion support list
