

# ONTAP software bundle update

ONTAP 9.12.1

Lenovo

## ONTAP update overview

- The DG5000 and DG7000 support ONTAP 9.12.1P4.
- ONTAP 9.12.1P4 has added support for Lenovo-specific VPD information.
- DG Series storage systems will support ONTAP 9.12.1P4 or any later versions.

### Existing Lenovo storage

For the DM Series (DM7100F, DM5100F, DM3000/5000)

- ONTAP Unified Premium → Lenovo Unified Complete Software
- ONTAP Unified Fundamentals → Lenovo Unified Essential Software

Example:

Old: Lenovo Unified Premium Bundle - ONTAP Unified 9.12.1

New: Lenovo Unified Complete Software 9.12.1P4

## DG5000 / DG7000 software bundle

License type	Feature name	Unified Complete	Unified Essential	Encryption Add-On
Controller-Based	NFS	v	v	
Controller-Based	CIFS	v	v	
Controller-Based	S3	v	v	
Controller-Based	FC	v	v	
Controller-Based	iSCSI	v	v	
Controller-Based	NVMeoF	v	v	
Controller-Based	SnapRestore	v	v	
Controller-Based	FlexClone	v	v	
Controller-Based	MTKM	v	v	
Controller-Based	SnapLock	v	v	
Controller-Based	Autonomous Ransomware Protection	v		
Controller-Based	SnapMirror Async	v		
Controller-Based	SnapMirror Sync/Bus. Cont.	v		
Controller-Based	SnapVault	v		
Controller-Based	SnapCenter	v		

The DG5000 and DG7000 support two new bundles:

- Unified Complete
- Unified Essential

For more information about After Point of Sale (APOS) service upgrades, refer to the [APOS Upgrade](#) website.

## DG5000 / DG7000 software bundle

License type	Feature name	Unified Complete	Unified Essential	Encryption Add-On
Controller-Based	Immutable	v	v	
Controller-Based	SnapRestore	v	v	
Controller-Based	FlexClone	v	v	
Controller-Based	MTKM	v	v	
Controller-Based	SnapLock	v	v	
Controller-Based	Autonomous Ransomware Protection	v		
Controller-Based	SnapMirror Async	v		
Controller-Based	SnapMirror Sync/Bus. Cont.	v		
Controller-Based	SnapVault	v		
Controller-Based	SnapCenter	v		
Host-Based	SnapMirror Cloud	v		
Host-Based	S3 SnapMirror	v		
Host-Based	FabricPool	APOS		
Controller-Based	Volume Encryption			v
Controller-Based	Trusted Platform Module (TPM)			v

The DG5000 and DG7000 support two new bundles:

- Unified Complete
- Unified Essential

For more information about After Point of Sale (APOS) service upgrades, refer to the [APOS Upgrade](#) website.

# New ONTAP bundles vs current DM bundles

License type	Feature name	(New) Unified Complete	Unified Premium	(New) Unified Essential	Unified Base	Encryption Add-On
Controller-Based	NFS	v	v	v	v	
Controller-Based	CIFS	v	v	v	v	
Controller-Based	S3	v	v	v	v	
Controller-Based	FC	v	v	v	v	
Controller-Based	iSCSI	v	v	v	v	
Controller-Based	NVMeoF	v	v	v	v	
Controller-Based	SnapRestore	v	v	v	v	
Controller-Based	FlexClone	v	v	v	v	
Controller-Based	MTKM	v	S&C	v		
Controller-Based	SnapLock	v	S&C	v		
Controller-Based	Autonomous Ransomware Protection	v	S&C			
Controller-Based	SnapMirror Async	v	v			
Controller-Based	SnapMirror Sync/Bus. Cont.	v	v			
Controller-Based	SnapVault	v	v			
Controller-Based	SnapCenter	v	v			

- S&C = Security and compliance bundle
- HC = Hybrid cloud bundle

# New ONTAP bundles vs current DM bundles

License type	Feature name	(New) Unified Complete	Unified Premium	(New) Unified Essential	Unified Base	Encryption Add-On
Controller-Based	FlexClone	v	v	v	v	
Controller-Based	MTKM	v	S&C	v		
Controller-Based	SnapLock	v	S&C	v		
Controller-Based	Autonomous Ransomware Protection	v	S&C			
Controller-Based	SnapMirror Async	v	v			
Controller-Based	SnapMirror Sync/Bus. Cont.	v	v			
Controller-Based	SnapVault	v	v			
Controller-Based	SnapCenter	v	v			
Host-Based	SnapMirror Cloud	v	HC			
Host-Based	S3 SnapMirror	v				
Host-Based	FabricPool	APOS	HC	APOS		
Controller-Based	Volume Encryption					v
Controller-Based	Trusted Platform Module (TPM)					v

- S&C = Security and compliance bundle
- HC = Hybrid cloud bundle

## **DG5000 / DG7000 license key change**

The DG5000 and DG7000 will be released with a new ONTAP software license key structure.

- Current DM products have an individual license key for each feature.
- For the current Premium Bundle, there are 28 license keys per system, with 14 license keys allocated per controller.
- The DG Series will use a new license key structure called IPA NLF license key.
- License keys are generated for specific bundles, and they unlock all the features included in those bundles.
- Each DG Series system will be equipped with either two or four license keys, with one key allocated for the Software Bundle and one key for encryption on each controller.
- This license key structure will eventually be used on all DM products.
