Problem determination and troubleshooting

How to perform problem determination actions on the SR665 V3

Problem determination and troubleshooting overview

Perform the following actions to determine the cause of problems on the SR665 V3:

- Check the system health status on the XCC2 dashboard
- Check the system event log in XCC2
- Check the event log in UEFI
- Check the LEDs on the system
- If applicable, check the external LCD diagnostics handset

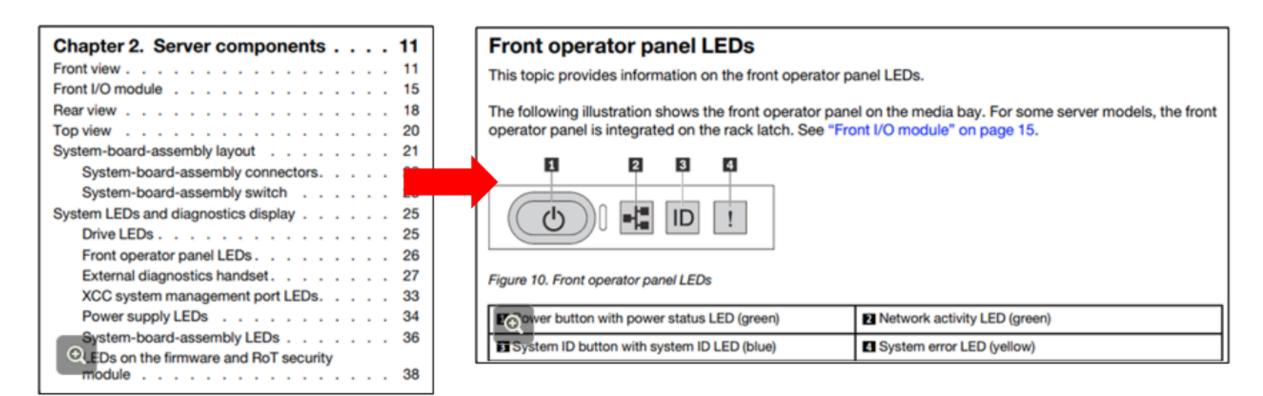

For more information about how to use XCC2, UEFI, or OneCLI to monitor system status and collect logs, refer to the following courses:

- ES51757C Introducing ThinkSystem tools
 https://lenovoedu.lenovo.com/course/view.php?idnumber=ES51757C
- ES41759C Introducing ThinkSystem problem determination https://lenovoedu.lenovo.com/course/view.php?idnumber=ES41759C

LED descriptions

Use the LEDs on the front operator panel, the rear side of the server, or the system board for hardware status monitoring and problem determination. For more information about the SR665 V3 LEDs, refer to the Server components section of the ThinkSystem SR665 V3 User Guide on Lenovo Support.

LCD diagnostic panel/handset

The SR665 V3 supports the optional integrated LCD diagnostic panel and external LCD diagnostic handset. The panel can be used to quickly access system information, such as active errors, system health status, firmware version, network connection status, and health information. A demo video is available on the course landing page.
