

Servicing the Diamanti SR630

ES42117

Lenovo

Prerequisites

- ES51757 – ThinkSystem tools
<https://lenovoedu.lenovo.com/course/view.php?idnumber=ES51757>
- ES71744 – Servicing the Lenovo ThinkSystem SR630
<https://lenovoedu.lenovo.com/course/view.php?idnumber=ES71744>

Objectives

After completing the course, you will be able to:

- Describe the Diamanti SR630 overview
- Describe the Diamanti SR630 support flow
- Describe the Diamanti SR630 hardware replacement procedures

Product overview

The concept of the Diamanti SR630

Lenovo

Diamanti SR630 overview

The Diamanti SR630 is an integrated software solution consisting of at least three ThinkSystem SR630 nodes (machine type 7X02CTO8WW), the Diamanti Ultima kit (a networking controller PCIe card and an NVMe drive controller PCIe card), and the Diamanti software.

For more information, refer to the Diamanti SR630 solution brief on the Lenovo Web site: <https://www.lenovo.com/us/en/resources/data-center-solutions/datasheets/diamanti-sr630/>
