

Prism overview

Introduction to Prism

Lenovo

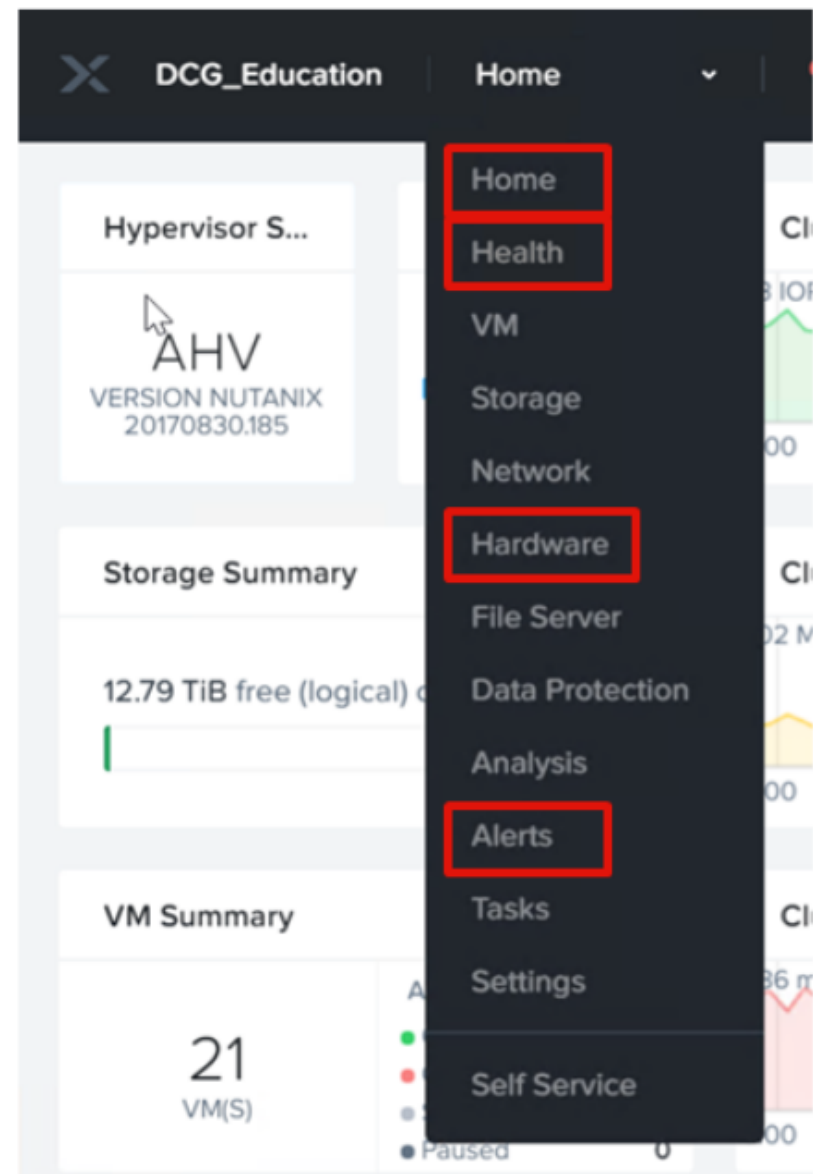

Prism Central

Prism is a distributed resource management platform which allows users to manage and monitor objects and services across their Nutanix environment. The management includes policy definition and compliance, service design and status, analytics and monitoring.

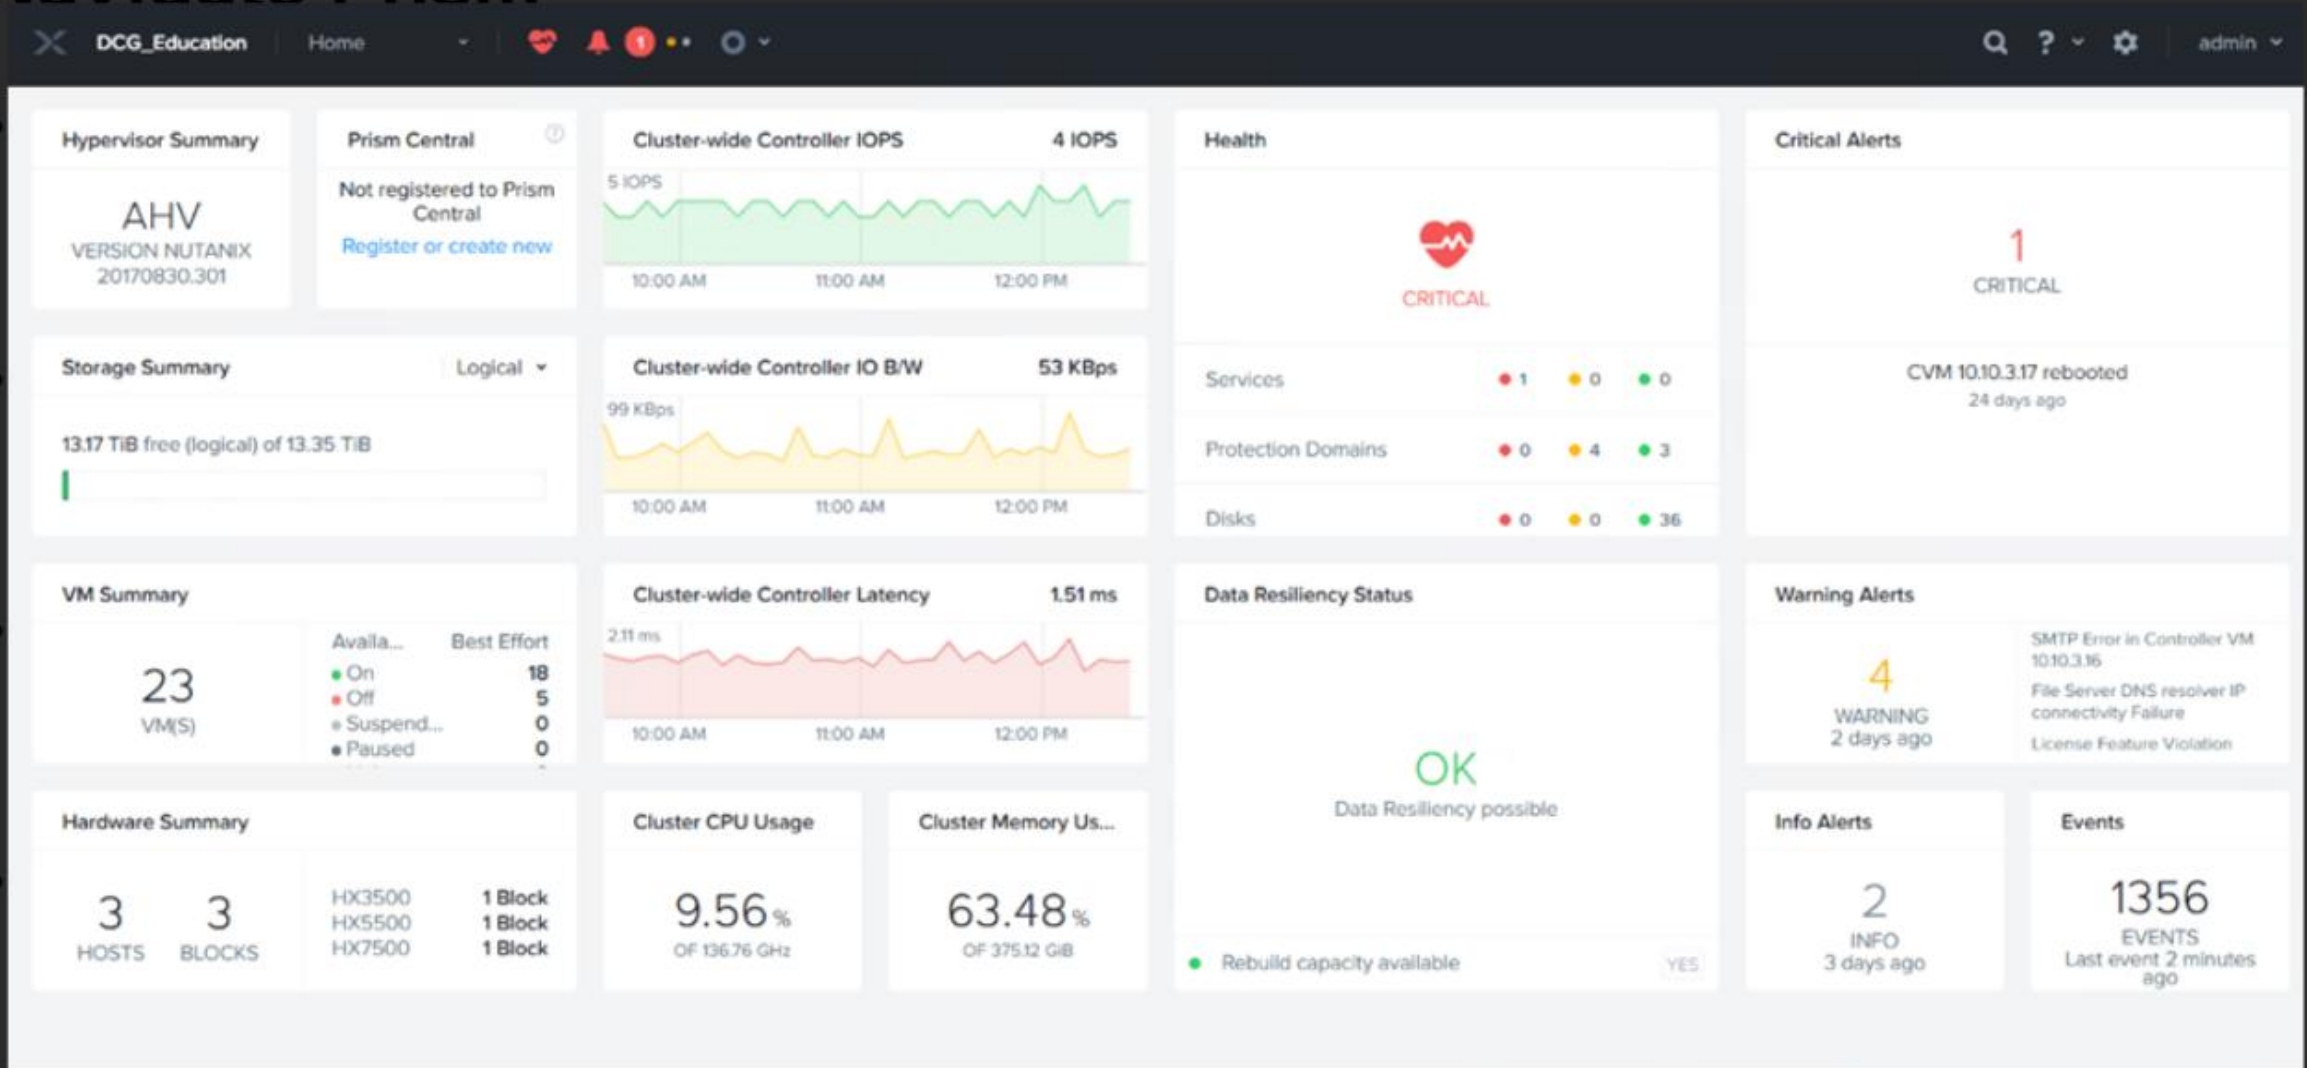

Navigate Prism

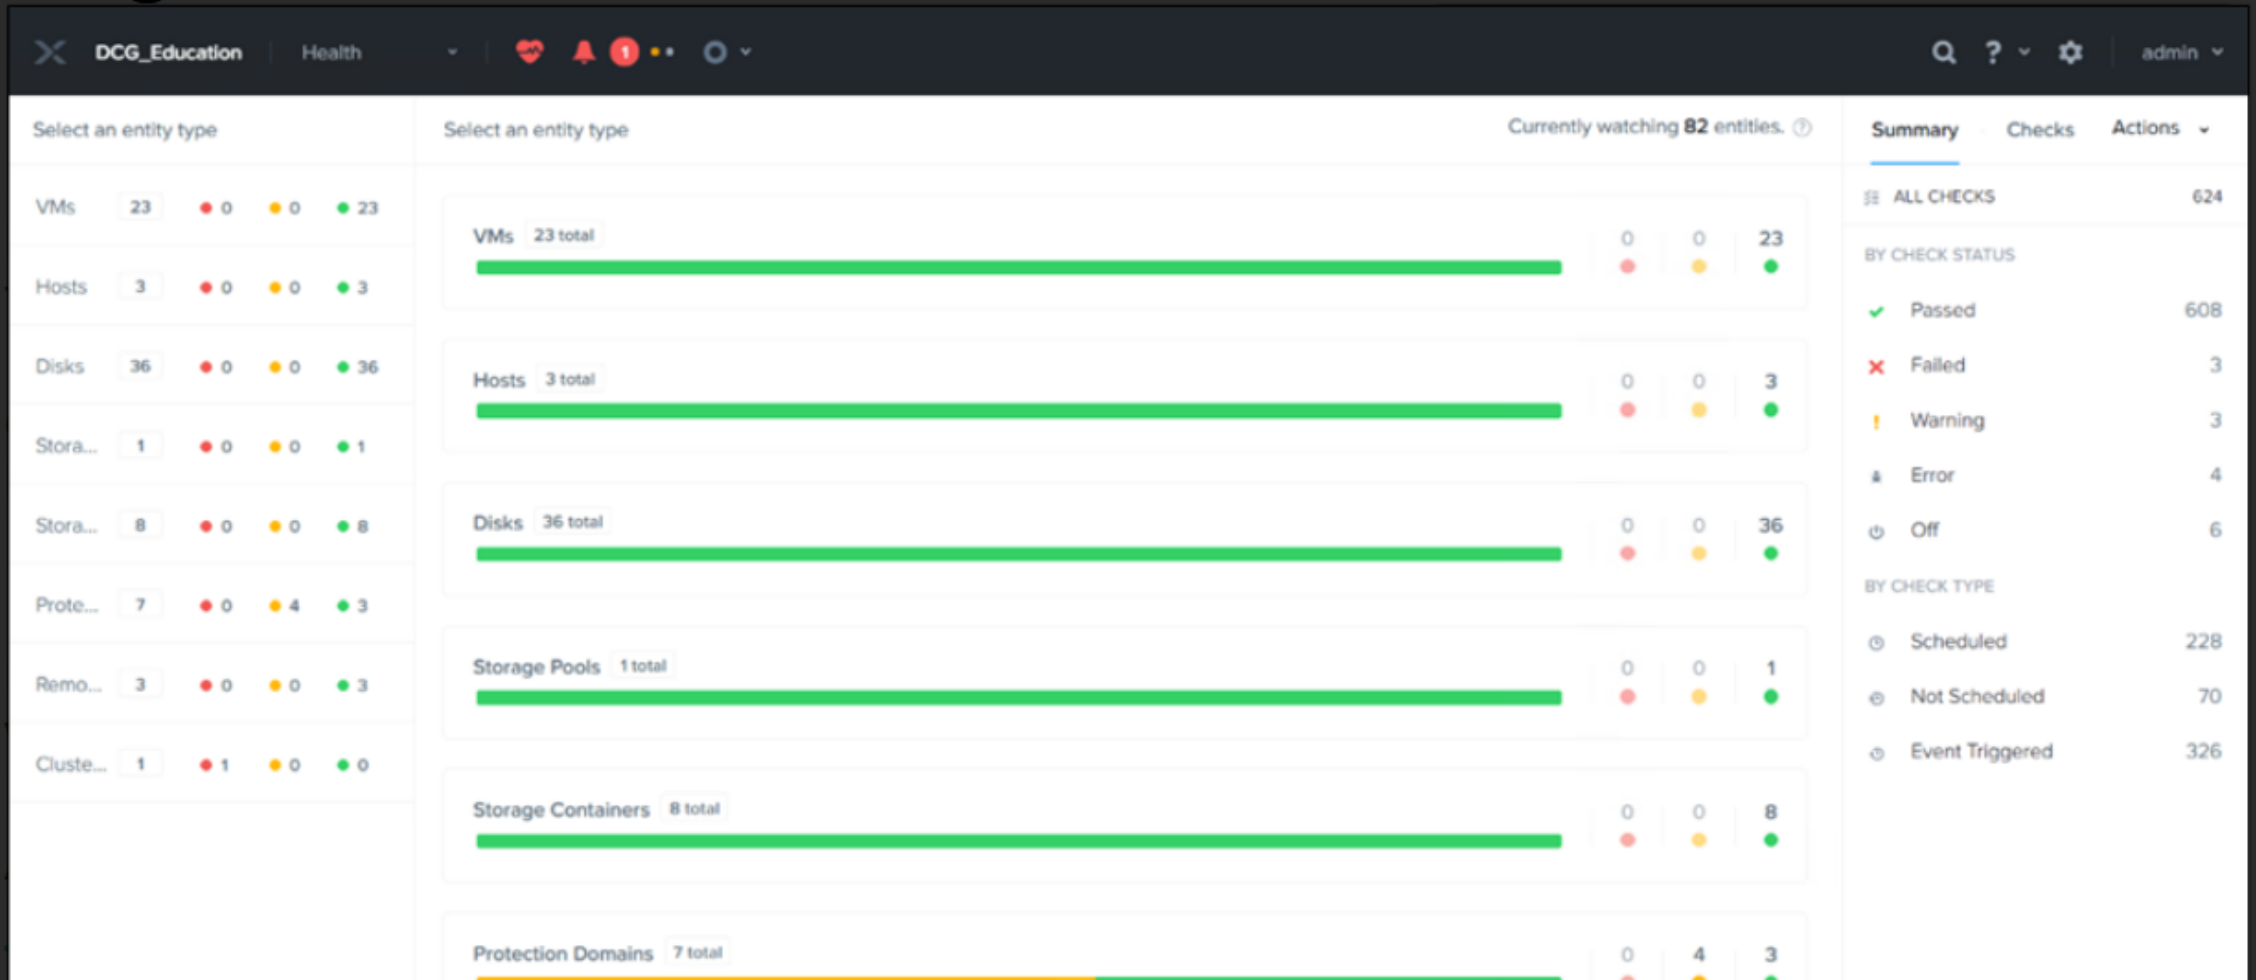

- Home Page: Local cluster monitoring dashboard including detailed information on alerts, capacity, performance, health, tasks, etc. (Click [HERE](#) to see the **Home** dashboard)
- Health Page: Environment, hardware and managed object health and state information. Includes NCC health check status as well. (Click [HERE](#) to see the **Health** dashboard).
- Hardware: Server, disk and network management, monitoring and health. Includes cluster expansion as well as node and disk removal. (Click [HERE](#) to see the **Hardware** dashboard)
- Alerts: Local cluster and environment alerts (Click [HERE](#) to see the **Alerts** dashboard)

Summary

HARDWARE SUMMARY

Blocks	3
Hosts	3
Total Memory	375.12 GiB
Total CPU Capacity	136.76 GHz
Disks	HDD: 28 disks SSD: 8 disks
Network Switches	0

Performance Summary

Cluster-wide CPU Usage

Cluster-wide Memory Usage

Cluster-wide Disk IOPS
