Lenovo

## SE360 V2 product overview

- The SE360 V2 (machine types: 7DAM, 7DBN) is an Intel® Xeon® D-2700 based 2U, half-width, short-depth edge server. This rugged edge server can handle temperatures from 0 °C to 55°C and can also withstand high levels of dust and vibrations.
- The SE360 V2 is designed to virtualize traditional IT and OT applications as well as new transformative edge AI systems, providing the processing power, storage, accelerator, and networking techniques required for today's edge workloads.
