# Features and specifications

The SE360 V2 is a purpose-built server designed for the unique requirements of edge computing.

- Its small form factor allows it to fit into locations that a normal data center server can't.
  - 2U height, half-width edge server
  - Height: 84.5 mm
  - Width: 212 mm
  - Depth: 317.5 mm
- It is designed to work in harsh, non-data center environments, and it supports:
  - Up to 40 G shock & 1.91 Grms vibration
  - IEC 60068, optional dust filter
- Easy to manage
  - The SE360 V2 is managed through XCC. Users have access to all the same features and benefits available on other ThinkEdge and ThinkSystem servers.
